5 BCN3DR ASSEMBLY GUIDE PRINTING SURFACE & SPOOL MOUNT

BOM ID	Description	Qty
1	Platform	1
2	Glass cam	1
3	Glass holder	2
4	DIN125 M3	1
5	DIN912 M3x10	1
6	DIN934 M3	1
7	DIN912 M3x8	2

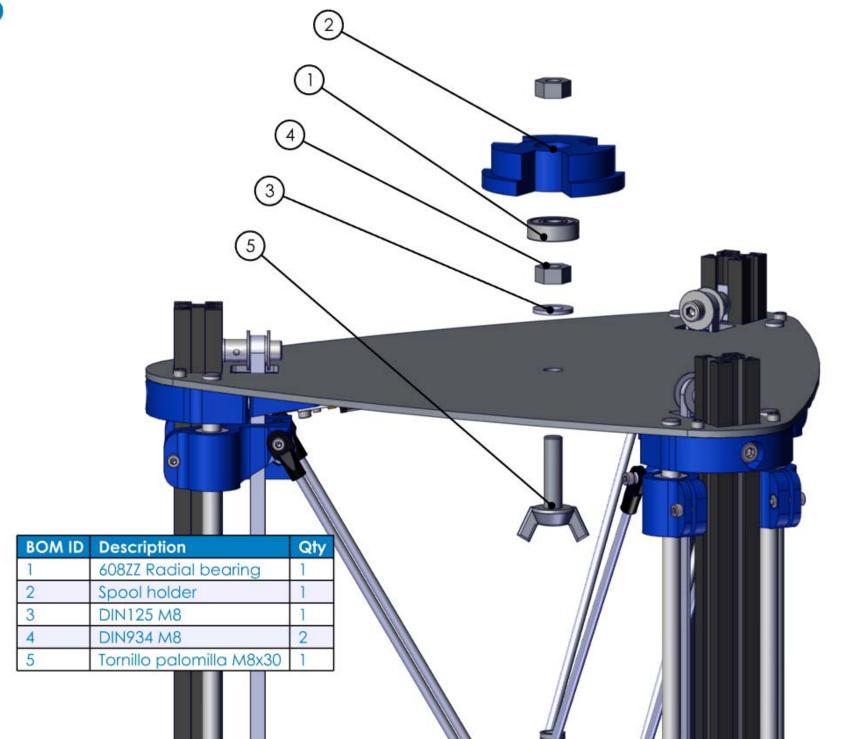

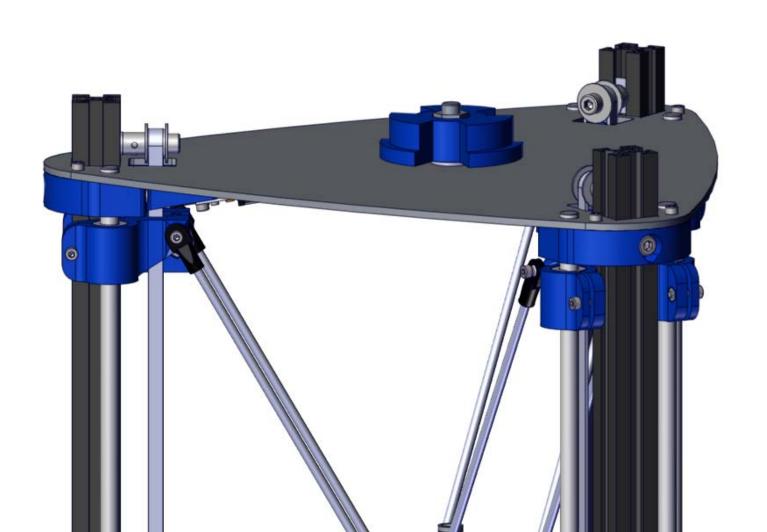

BOM ID	Description	Qty
1	Printing surface spring	3
2	DIN912 M5x20	3

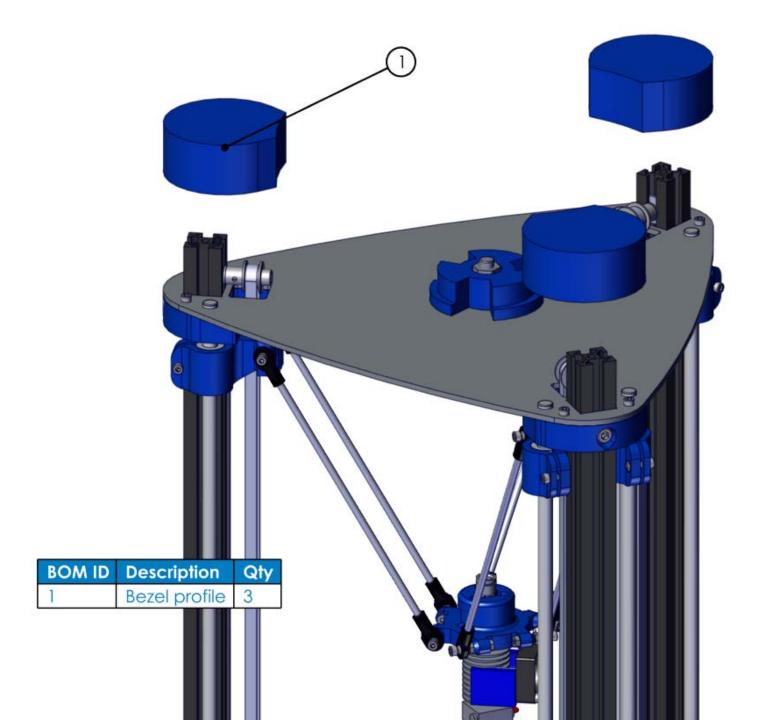

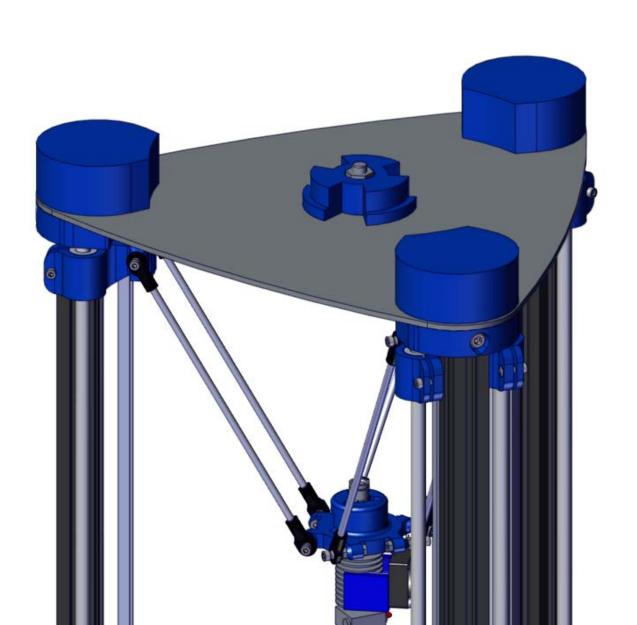

BOM ID	Description	Qty
2	Glass	1

Calibración eje Z

Para la calibración del eje Z procederemos al nivelado de la placa Top Mount. Para ello utilizaremos los Bezel Profile colocados en la diapositiva 7. Si observamos que esta pieza no llega a tocar la placa Top Mount deberemos proceder a subir toda la parte superior de la impresora. Para ello:

- 1. Aflojar el tornillo M5x10 del perfil.
- 2. Aflojar los dos tornillos M3x10 que sujetan las varillas a cada lado del perfil.
- 3. Empujar toda la parte superior de la impresora hasta eliminar el espacio entre la pieza Bezel Profile y la placa Top Mount.
- 4. Repetir el proceso para los otros 2 perfiles.
